

# CONTRACTOR FLAIL COLLECTOR

## HEAVY DUTY FLAIL MOWER COLLECTOR

The Contractor Collectors are heavy duty machines designed for cutting and collecting a large variety of materials. They have a number of applications ranging from annual/biannual grass cuts, wild flower management and roadside clearance to the cutting and collecting of heather for regeneration purposes and the control of invasive species.

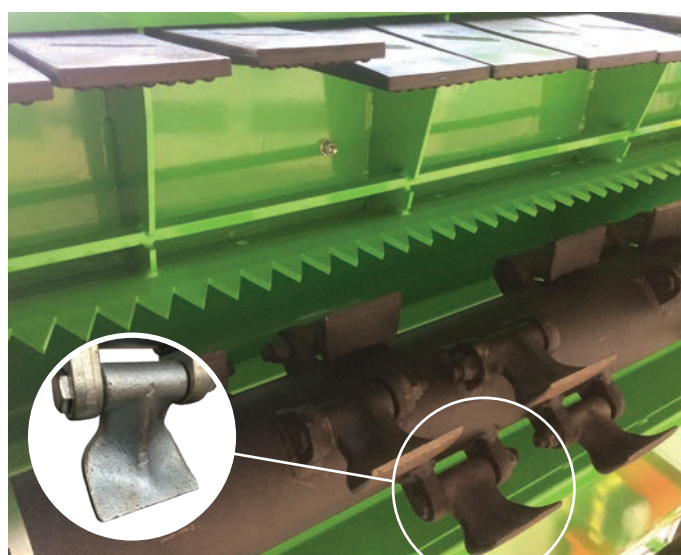

In addition to dealing with heavy and dense material such as long/wet grass, scrub, bracken and gorse up to 100mm thick the straight cutting edge on the flail and the roller combine to leave a high quality finish on grass. They are also available in various widths to suit a wide range of tractors.

A combination of HD cast rotor mountings, 1.4kg hammer flails and HD machined bearing housings allow the machine to work in the most extreme conditions reducing the risk of damaging the machine from hitting unknown and unseen obstacles.

Cutting and clearing gorse

Inset: HD machined bearing housing to cope with shocks to the rotor

Contractor super heavy duty flail rotor with toothed shredding bar

Inset: HD 1.4kg Hammer Flail to deal with material up to 100mm diameter

C2200CHS Super	2200	2.6	1270	30	0 – 200	100	High Tip

## Standard Specification

- » **1.4kg heavy duty cast hammer flail** – can cut through material up to 100mm in diameter.
- » **18mm flail fixings** – prevents flails breaking off if they come into contact with hidden obstructions.
- » **Heavy duty cast flail rotor mountings** – stops excessive wear from bolts unlike pressed steel mounts.
- » **Heavy duty gearbox with overrun clutch and 'V' belt drive system** – reduces the risk of damage to the gearbox or tractor.
- » **Ground or high tip options** – emptying flexibility to suit your job.
- » **Full width height adjustable rear roller** – accurate cutting height control.
- » **Three point linkage mounted** – easy to manoeuvre around trees etc or in areas with restricted access.
- » **HD rotor bearings** – withstand shock loads to the rotor in tough environments.
- » **HD Side Skids** – help follow the ground and reduce damage to the machine on rough terrain.
- » **Available in 1.2m / 1.6m / 1.8m / 2.0m and 2.2m cutting widths** – to suit a wide range of tractors.

## Options:

- » HD bearings and housings – ideal where stones are present (standard on 2m / 2.2m CHS Super models)
- » Side Skids (standard on 2m / 2.2m CHS Super models)
- » Front feeder plate – assists with intake of tall material
- » Twin wheel height adjustable front castor kit
