

COMPACT WEIGHTBOX & WORKBOX

INTERCHANGEABLE CLOSE COUPLED MOUNTING BOX

Ryetec's Compact WeightBox and Compact WorkBox have been designed to share the same features as its bigger brother but as a more condensed unit. A unique front weight design with the ability to be both close coupled & 3 point linkage mounted which amplifies the weight by increasing the leverage. They are fully customisable in a range of colours to match your tractor with your choice of logo to the front.

Designed with the modern day operator in mind, the boxes act as a mobile workshop and minimise the need to carry tools in the cab or drive back to the workshop when a simple repair can be done in the field. They enable the operator to carry spare parts for machines, tools, vices, fuel canisters, spray bottles etc all in a secure box sealed against dust and water.

Compact Weightbox Standard Specifications:

- » Cat 2 linkage mounting
- » Unique interchangeable linkage as standard allowing for std 3 point mounting or close coupled mounting (linkage folded)
- » Permanent concrete counterweight (any weight up to 1000kg)
- » Full width toolbox with non-slip rubber mat base
- » Illuminated tool box with internal LED lights
- » Gas strut supported and sealed full-width bonnet
- » Simple bonnet release with locking capability
- » Customised front name plate with optional backlight
- » Front LED hazard lights and worklights
- » Hazard marking signs

Compact WorkBox

A Compact WorkBox is a Compact WeightBox without the permanent counterweight. This allows for increased storage space for tools and optional extras. Weighing 330kg unladen they come with a removable tool tray.

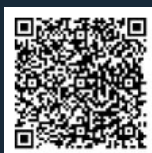

Compact workbox internal storage space

Unique interchangeable linkage mount as standard
