

RYETEC LT WEIGHTBOX

WEIGHTED FRONT BOX WITH TOOL STORAGE

The Ryetec LT Weightbox and Workbox has been developed as a more cost-effective alternative to its larger counterpart. Despite the reduced price point, it retains many of the standout features, including a dust- and water-sealed toolbox with rubber matting and a lockable lid. Additional options include a personalized nameplate, while standard features such as integrated strobe lights remain included.

Designed with the modern day operator in mind, the boxes act as a mobile workshop and minimise the need to carry tools in the cab or drive back to the workshop when a simple repair can be done in the field. They enable the operator to carry spare parts for machines, tools, fuel canisters, spray bottles etc all in a secure box sealed against dust and water.

LT Weightbox Standard Specifications:

- » Cat 2 linkage mounting
- » Permanent concrete counterweight (weighted from 600 - 1500KGS)
- » Full width toolbox with non-slip rubber mat base
- » Gas strut supported and sealed full-width bonnet
- » Simple bonnet release with locking capability
- » Customised front name plate
- » Front LED hazard lights
- » Hazard marking signs

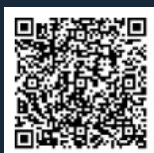

Choice of colour and nameplates

Large internal storage area with dust and water seal
