

# WEIGHTBOX & WORKBOX

MORE THAN JUST A WEIGHT BLOCK

Ryetec's WeightBox and WorkBox have been designed to combine an effective counterweight with secure and easy to access tool storage in a full-width large capacity toolbox. They are fully customisable in a range of colours to match your tractor with your choice of logo to the front.

Designed with the modern day operator in mind, the boxes act as a mobile workshop and minimise the need to carry tools in the cab or drive back to the workshop when a simple repair can be done in the field. The large capacity enables the operator to carry spare parts for machines, tools, vices, fuel canisters, spray bottles etc all in a secure box sealed against dust and water.

## WeightBox Standard Specifications

- » Cat 2 linkage mounting
- » Permanent concrete counterweight (any weight up to 1,500kg)
- » Can be front or rear mounted
- » Full width toolbox with non-slip rubber mat base
- » Illuminated tool box with internal LED lights
- » Grease gun and oil storage compartments
- » Gas strut supported and sealed full-width bonnet
- » Simple bonnet release with locking capability
- » Customised front name plate with optional backlight
- » Front LED hazard lights and worklights
- » Front tow attachment
- » Hazard marking signs

## WorkBox

A WorkBox is a WeightBox without the permanent counterweight. This allows for increased storage space for tools and optional extras. Weighing 400kg unladen they come with two removable tool trays.

## Belly Weights

Belly weights are removable counterweights with a quick detach mechanism. They allow the operator to add/remove extra weight quickly and easily without the need for an additional forklift. This reduces tyre wear when the counterweight isn't required whilst still keeping tools etc. easily accessible. 500kg, 750kg or 1,000kg options.

## Optional Extras - Overleaf

WorkBox with Removeable Trays, Stainless Steel Name Plate and Fixed Vice
