

# RYETEC RESTORER ALD-E

## ARABLE LOW DISTURBANCE SUBSOILER

The Ryetec Restorer ALD-E has been designed for use in arable land to relieve compaction and ground damage caused by previous operations, restoring the ground prior to cultivation or drilling operations.

Causing minimal surface ground disturbance with the combination of a cutting disc and a low disturbance point which shatters the underground surface, breaking any pan thus relieving compaction and aiding drainage.

Available with either full Auto Reset or Shearbar system

### Standard Specification:

- » **3m unit with 6 legs & points with tungsten tips** - longer lasting points for reduced running costs & downtime.
- » **Shearbar protection for legs** - where conditions are unlikely to cause repeated obstruction of the legs (Auto reset option available).
- » **20mm Hardox legs that are depth adjustable to 300mm** - for high resistance to damage and wear with accurate and easy depth adjustment.
- » **Heavy duty pivoting discs & legs** - allow for ease of manoeuvrability around obstacles.

### Options:

- » **Optional Stocks Ag Seeding Equipment**- ability drill OSR and cover crops.
- » **Ribbed rear packer roller** - leaves an even intergrated surface.
- » **Alternative legs & points** - customers preferred legs/points can be fitted.
- » **Auto Reset** - where more testing conditions are likely to cause repeated interference with the legs.
