

# RYETEC TRACK E-RADICATOR

## ADAPTABLE LOW DISTURBANCE TOOLBAR

The Ryetec Track E-Radicator has been designed for use with high powered tractors and crawlers to remove any compaction cause by the tractor itself while carrying out cultivations, drill operations, or simply tramline busting with or without an optional packer roller

Causing minimal surface ground disturbance with a large 500mm cutting disc and low disturbance point on a steering arm. It is ideal when used on tracked tractors or when working headlands, relieving compaction and aiding drainage.

Available with either full Auto Reset or Shearbar system

### Standard Specification:

- » **3m toolbar with 4 legs & points with tungsten tips** - longer lasting points for reduced running costs & downtime.
- » **Adjustable leg positioning** - legs feature frame clamping system to allow for exact positioning of legs relative to tractor wheel/track width and wheel centres.
- » **20mm Hardox legs that are depth adjustable to 400mm** - for high resistance to damage and wear with accurate and easy no tool depth adjustment.
- » **Shearbar protection for legs** - where conditions are unlikely to cause repeated obstruction of the legs (Auto reset option available).
- » **Heavy duty pivoting discs & legs** - allow for ease of manoeuvrability around obstacles, headland following and steering pressure from tracked or pivot steer tractors.
- » **Rear linkage & drawbar** - heavy duty with hydraulic raise and lower to pull rear mounted implements.
- » **Umbilical transfer system** - to convey hydraulic and electrical services to rear mounted implements.

### Options:

- » **Extra legs (up to 6)** - for full width low disturbance operation.
- » **Optional Stocks Ag Seeding Equipment** - ability to drill OSR & cover crops.
- » **Rear packer roller (flat or ribbed)** - for stand alone operation.
- » **Alternative legs & points** - customers preferred legs/points can be fitted.
- » **Auto Reset** - where conditions will cause repeated interference with legs.
